

# MindNode Review Guide

## What Is MindNode

**MindNode is a visual brainstorming and mind mapping app** that helps you connect your thoughts and clarify your ideas.

We believe that using software should be **easy, intuitive and a pleasure** rather than a chore. To achieve that, MindNode does all of the heavy lifting to make your mind map look beautiful without getting in your way. Our clean and minimal design lets you focus on releasing your thoughts from your mind and seeing how they form.

**Whether it's on your iPhone when on the go or your iPad or Mac at work, with MindNode, you stay productive wherever you are.**
